Portfolio — live systems, screenshots & how my experience maps to this role: irenemart.in

PROFESSIONAL SUMMARY

Technology and operations professional with hands-on experience building and supporting live business applications, configuring user access and permissions, resolving account, software, and Windows PC issues, and managing cloud deployments. Previously promoted into operations management, supporting employee accounts, training, documentation, and daily systems for a team of up to 80 employees and agents, and onboarding and training 300+ people over two years. Builds AI-assisted tools and automations for businesses and helps users adopt them. Methodical problem-solver and clear communicator, fluent in English and Spanish.

TECHNICAL SKILLS

- **Computer & User Support:** macOS and Windows PC setup and troubleshooting; login, application, and connectivity issues; user guidance and documentation.
- **Identity & Access:** User account setup, Google OAuth, role-based access control (RBAC), application permissions, database access policies, permission testing.
- **Networking & Infrastructure:** Domain and DNS configuration, Cloudflare, router and Wi-Fi configuration; working knowledge of TCP/IP and DHCP.
- **Applications & Deployment:** Supabase, PostgreSQL, Git, GitHub, cloud deployments, release verification, rollback workflows, JavaScript, React, APIs.
- **AI Tools & Adoption:** Claude, ChatGPT, Gemini, Codex; AI-assisted development, building AI-powered tools, workflow automation, training users on AI tools.
- **Business Platforms:** Google Workspace, Microsoft 365, RingCentral, Priority1 TMS, CMS insurance platforms, Sircon, carrier portals, QuickBooks, LeadConnector CRM.

PROFESSIONAL EXPERIENCE

eBuilt.app — Founder & Software Systems Developer

May 2025 – Present · Orlando, FL

- Sold, built, and delivered 6 software projects for business clients, translating their needs into practical systems used in daily operations, including a logistics platform supporting 34 users.
- Configure authentication and role-based permissions for applications serving owners, administrators, dispatchers, drivers, and customers.
- Investigate software and access problems by reproducing issues, checking configuration and permissions, testing fixes, and verifying results.
- Manage domains, DNS, Cloudflare deployments, GitHub repositories, and version-controlled releases.
- Test user roles and application workflows, document defects and fixes, and verify that changes work as intended.
- Build AI-assisted tools and workflow automations for client operations, and guide clients in adopting them.
- Research unfamiliar technical documentation and integrations, maintain project and handoff documentation, and explain technical processes to nontechnical users.

Selected projects: M.D. Sky OS (mdskyos.com) — live logistics platform supporting 34 users across owner, dispatcher, driver, and customer roles, with authentication, access controls, testing, deployment, and an in-app support center with role-based help articles and guided walkthroughs. **My Sweet Pawtner** (mysweetpawtner.com) — live booking website and database-backed administration portal with tested customer and administrative workflows. Prime Healthcare — Insurance Sales Representative → Operations Systems & Sales Manager

May 2023 – May 2025 · Fort Lauderdale, FL

- Progressed from insurance sales into operations management, taking responsibility for employee support, business systems, training, and daily workflows for a team of up to 80 employees and agents; onboarded 300+ people and maintained their accounts, permissions, and records over two years.
- Set up employee accounts and workstations, and resolved login, application access, Windows PC, and software configuration issues so staff could stay productive.

- Supported employees using CMS insurance platforms, Sircon, carrier portals, and other business applications; investigated issues and coordinated escalation when needed.
- Designed onboarding, payroll coordination, and administrative procedures and trained staff to follow them consistently; trained 300+ agents in sales processes and methods.
- Created training videos, written procedures, and reference materials so employees with varying technical experience could use systems and follow workflows independently.
- Built tracking systems for onboarding, licensing, compliance, scheduling, payroll coordination, and performance, improving visibility into deadlines and outstanding tasks.
- Reviewed records and processes to identify missing information and recurring problems, improving documentation and follow-up.
- Handled confidential employee and customer records with care, accuracy, and discretion.

Sebanda Insurance — Customer Service & Sales Representative

2022 – 2023 · Hollywood, FL

- Assisted customers in English and Spanish, resolved account and service questions, organized documentation, and followed up on outstanding requirements.

Eurobake — Inventory & Warehouse Support

2021 – 2022 · Portland, OR

- Tracked inventory, maintained supply records, and coordinated orders to support daily warehouse and production operations.

EDUCATION

High School Diploma — Apostol San Pedro, Santiago, Chile · 2017
Pre-university science coursework (pre-med track) — Preuniversitario Gustavo Molina, Santiago, Chile · 2017–2019

LICENSES & QUALIFICATIONS

Valid Florida Driver's License · Florida 2-15 Health, Life & Annuities License · Florida 4-40 Customer Representative License · Fluent in English and Spanish
